1. Aid for learning the calculation consisting of differently coloured geometric bodies (10, 12, 14), characterized in that each body (10, 12, 14) is representing a number and is having a definite geometric shape and a definite colour, wherein each decimal step position (ones, tens, hundreds, thousands) a definite geometric shape is assigned and each number (0 to 9) a colour is assigned.

2. Aid according to claim 1, characterized in that the geometric shapes of the bodies (10, 12, 14) are chosen such that the bodies (10, 12, 14) can be stacked above each other.

3. Aid according to claim 2, characterized in that the step position "Ones" is assigned the geometric shape "cube", the step position "Tens" the shape "cylinder" is assigned, the step position "Hundreds" the geometric shape "right parallelepiped" is assigned and, the step position "Thousands" the geometric shape "right parallelepiped with notches" is assigned.

4. Aid according to any of the claims 1 to 3, characterized in that each body (10, 12, 14) additionally to the colouring is inscribed with the corresponding number.

5. Aid according to any of the claims 1 to 4, characterized in that additionally tables (20, 22, 24,

26) are provided on which the numbers are depicted represented by the corresponding bodies (10, 12, 14) or corresponding two-dimensional areas (30, 32, 34).

- 5           6. Aid according to claim 5, characterized in that on the  
          tables (20, 22) the numbers 1 to 100 are depicted in  
          ten lines and ten columns.
- 10          7. Aid according to claim 5, characterized in that on the  
          tables (24, 26) the numbers 1 to 99 are depicted  
          arranged in ten lines and ten columns.
- 15          8. Aid according to any of the claims 1 to 7,  
          characterized in that additionally uncoloured bodies  
          having the corresponding geometric shapes are provided.
